RESPONSIBLE CRUISING. REMARKABLE EXPERIENCES.

Avalon is charting an ambitious course toward zero emissions and responsibility in every aspect of cruising. Our state-of-the-art fleet of Suite Ships® and top-of-the-line technology limit energy, consumption and emissions. Plus, Avalon's waste and recycling programs reduce our environmental footprint, save water and foster a culture of environmental responsibility among our crew and guests worldwide. Avalon's leadership in responsible cruising practices has been recognized by the Green Award Foundation, granting Green Award status to our entire European fleet, including a Gold Award for the *Avalon Alegria*. This is just the beginning of what we have planned to protect our beautiful Mother Earth—and her fans.
