AN INNOVATIVE AND **SUSTAINABLE SHIP.**

THE SOLUTION

1 RESPECT FOR THE ENVIRONMENT.

- > Thanks to the use of **liquefied natural gas (LNG)***, the most advanced technology currently available in the maritime sector to **reduce emissions**, it is possible to almost totally eliminate the emission of sulfur oxides (zero emissions) and particulate matter into the atmosphere (95-100% reduction), while also significantly reducing nitrogen oxide emissions (direct reduction of 85%) and CO2 (up to 20%).
- > The ship's entire daily water requirements are met by transforming sea water with the **use of desalinators**.

AN INNOVATIVE AND SUSTAINABLE SHIP.

- › **Consumption is minimised** thanks to a smart energy efficiency system: **the elevators** are **almost zero-consumption**, recovering and recycling 100% of the energy, **the kitchens** are **low-impact** with ovens equipped with a controlled ventilation system, **consumption in laundries** is **reduced by 50%** for each kg of laundry and the daily consumption for washing dishes is reduced by 35%.
- › 100% categorization and sorting of waste onboard, recycling of aluminum, plastic and glass.
- › We value food, without wasting it. That's why we've redesigned over 500 recipes, favouring **seasonality, proximity and nutritional value**, as well as quality and taste!
- › We raise awareness among our guests and crew about **responsible Consumption**: we have **reduced food waste by 27%**.
